DETAILED ACTION

1. There are appeared three paragraphs claiming the benefit of a prior application inserted after the first line of the specification by respective amendments to the specification filed 2/24/2004, 07/18/2002 and 9/24/2001. Applicant is requested to cancel the insertion by the amendments to the specification filed 07/18/2002 and 9/124/2001.

2. Claims 1-4,6-8 and 15-20 are rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Pannu v. Storz Instruments Inc.*, 258 F.3d 1366, 59 USPQ2d 1597 (Fed. Cir. 2001); *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to claim subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope of claim subject matter surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

Art Unit: 2621

Upon review of the parent application, there appears to be improper recapture attempted. Applicant specifically amended the claims in the original application which matured to Pat. No. 5,434,677, to include the following language: "...said heads being constructed either as a double azimuth head assembly or as a pair of heads angularly separated by 180°." Applicant then went on in their remarks to state:

"Claim 1 is amended to recite, 'said heads being constructed either as a double azimuth head assembly or as a pair of heads angularly separated by 180°.' It is believed that this structural recitation of the heads supports the limitation in the claim wherein the tape is transported at different tape speeds, depending upon whether the heads are constructed as the double azimuth head assembly or the heads are constructed as a pair of angularly separated heads.. In view of the amendment made to Claim 1 and the foregoing discussion, it is respectfully submitted that Claim 1 is clear and definite and the objection thereto should be withdrawn."

This amendment was in response to a 112 rejection. Applicant amended the claim to overcome the rejection and place the application in condition for allowance. Therefore, applicant may not, in a reissue, remove this limitation in its entirety. In order to correct, applicant needs to re-insert the language above.

3. Applicant is notified that any subsequent amendment to the specification and/or claims must comply with 37 CFR 1.173(b). In addition, when any substantive amendment is filed in the reissue application, which amendment otherwise places the

reissue application in condition for allowance, a supplemental oath/declaration will be required. See MPEP § 1414.01.
